Nova Scotia		13%	6
Ontario		26%	12
Saskatchewan		4%	2
Yukon		4%	2
<b>Total Responses</b>			<b>46</b>

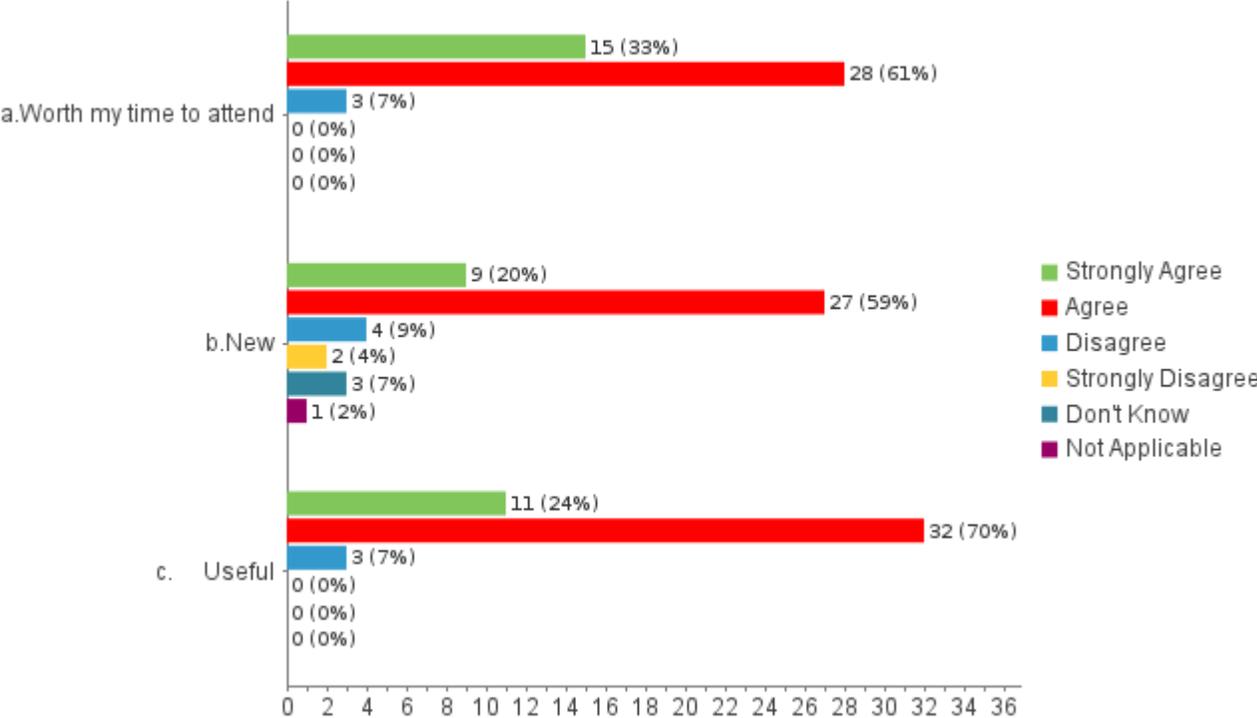

### Question 4 I understand:

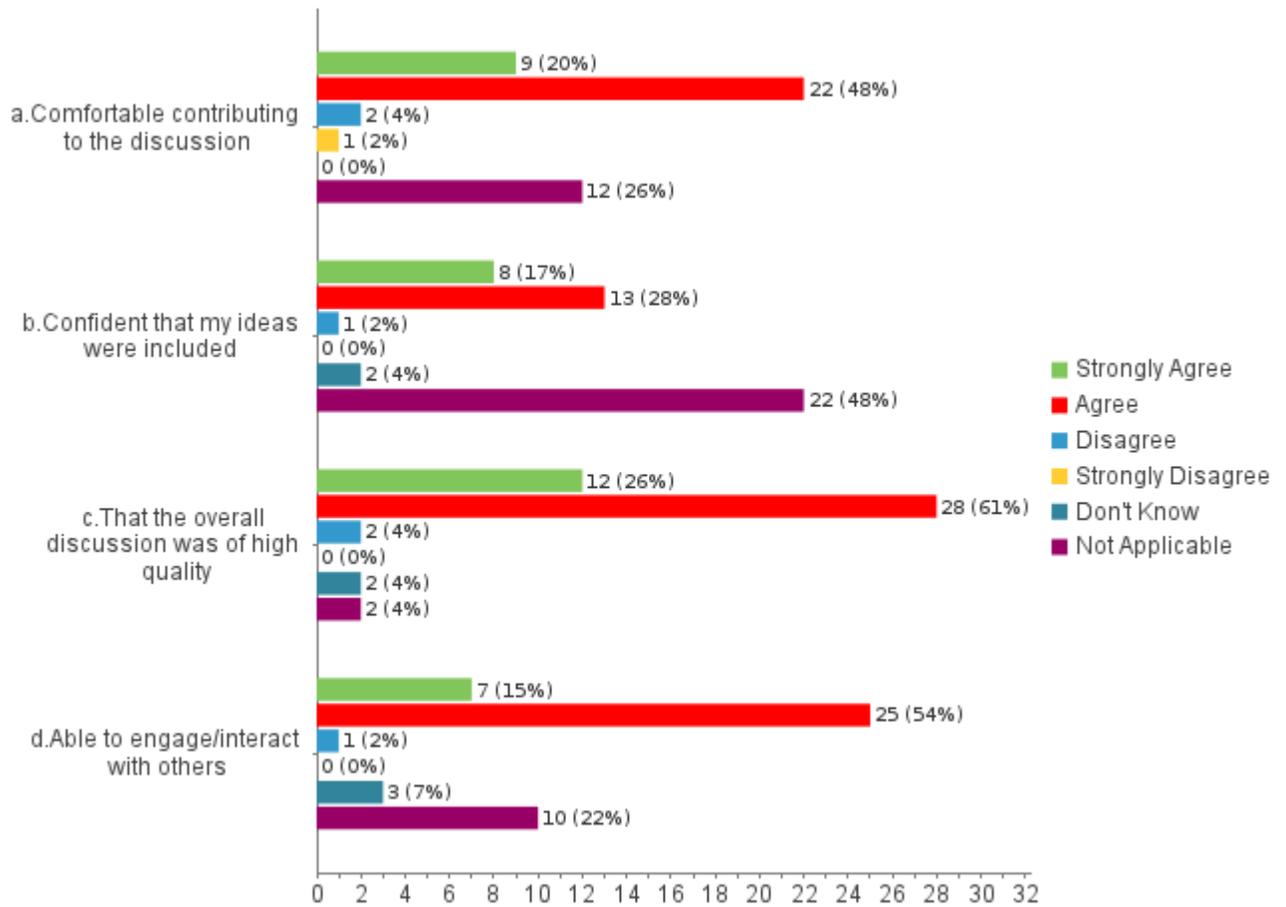

### Question 5 The information presented at the Webinar was:

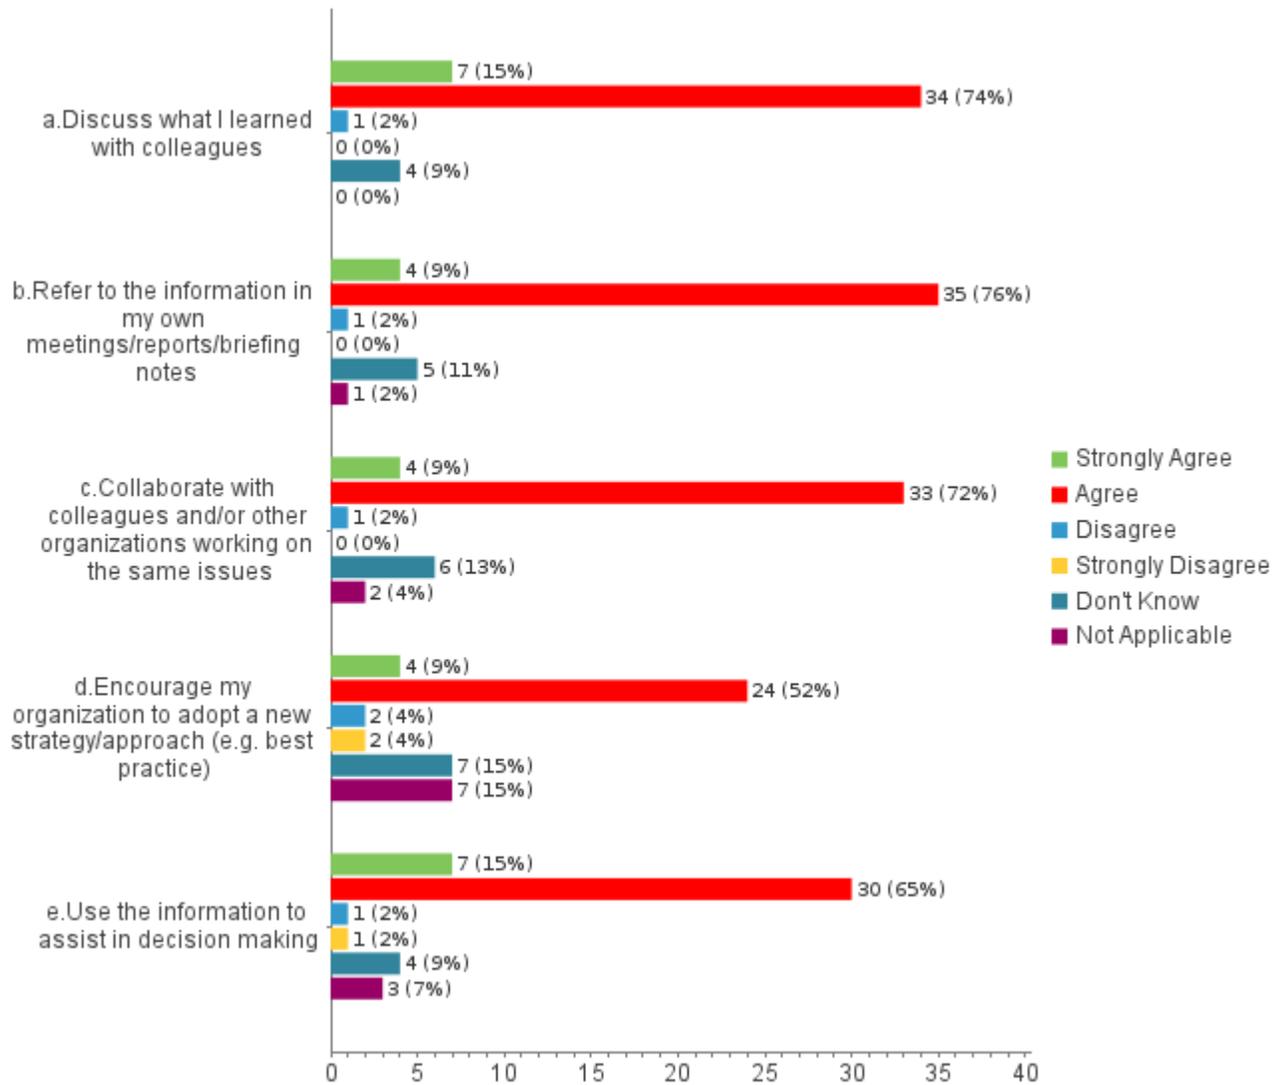

**Question 6 The Webinar was:**

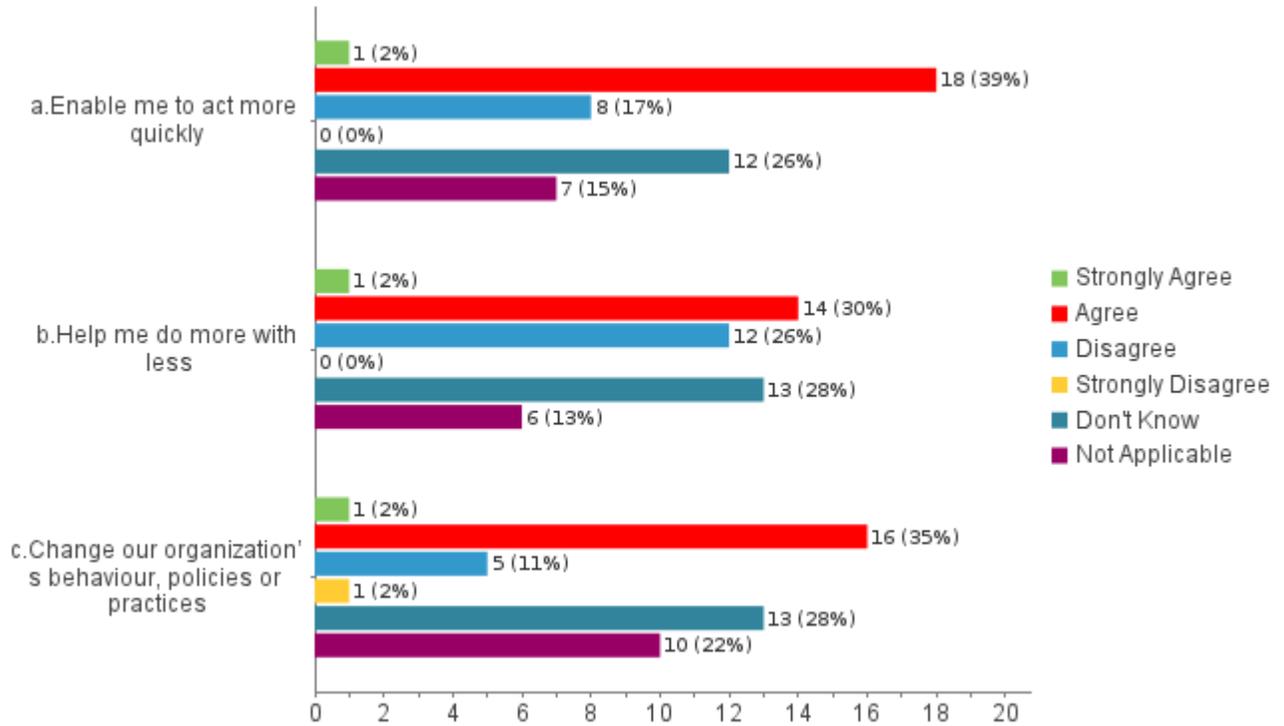

### Question 7 During the Webinar, I felt:

## Question 8 As a result of attending the Webinar, I plan to:

### Question 9 The information/activity take-away will:

### Question 10 Will the knowledge/information gained from the Webinar lead you to: (Please check all that apply)

Response	Chart	Percentage	Count
Network with others		46%	21
Coordinate with others		35%	16
Cooperate with others		28%	13
Collaborate with others		52%	24
No difference		9%	4
Please Explain:		0%	0
<b>Total Responses</b>			<b>46</b>

### Question 10 Will the knowledge/information gained from the Webinar lead you to: (Please check all that apply) (Please Explain:)

# Response

**Question 11 Please provide any other general feedback on the Healthy Canada by Design Webinar:**

The 26 response(s) to this question can be found in the appendix.

## Appendix

### Question 11 Please provide any other general feedback on the Healthy Canada by Design Webinar: |

#	Response
1.	Interesting seeing the differences between the three sites, but would have liked more details on what actions communities were taking. But may be early days still. a lot of what was discussed was pretty high level process info, which is useful but somewhat repetitive across programs. thanks! very interesting
2.	Thank you very much.
3.	Thanks for providing the links....
4.	Great speakers.
5.	The comments by some of the presenters implies that rural areas need someone (assumably from an urban site) to "bring" things to rural areas. A more successful and effective approach might be to work "with" rural areas to see what has worked in the areas to improve capacity and healthier designs!
6.	The comments by some of the presenters implies that rural areas need someone (assumably from an urban site) to "bring" things to rural areas. A more successful and effective approach might be to work "with" rural areas to see what has worked in the areas to improve capacity and healthier designs!
7.	Looking forward to receiving the RALA Tools, once they are released.
8.	Looking forward to receiving the RALA Tools, once they are released.
9.	Good session. Great to hear from other locations in Canada as to how they are handling similar issues. Well presented.
10.	The webinar provided insight and information into how HBE is being assessed and promoted. Perhaps there could be a follow up on examples of specific actions that can be taken to achieve a HBE.
11.	Our organization is aware of best practice and including BP in conversations and planning with community partners. Learn about a tool and how it was used in communities.
12.	I was thrilled to be able to connect with someone else experiencing similar concerns. It was an excellent forum for exploring related issues.
13.	All 3 shared common theme (Using the RALA tool, participate in CCLASP, etc.) and some things felt redundant but the topic was presented so abstract even hearing about it 3 times, I am still not clear about what was done on the ground and what impact it has made (or is making). This may be because I'm not in or work with the health care sector. A few examples of RALA questions or explaining "Healthy Community by Design" would have been helpful for me. It would have more beneficial if the 3 exapmles are from different stages of using the same tool. The general discussion on the side of the presentation was a lot more lively and engaged around interesting and tangible topics - they may or may not be directly related to the presentation topic, but there was no way of knowing and the

	discussion/online chat feature looked disconnected and under-utilized.
14.	3 presentations seemed redundant and all were abstract. speakers from different stages of the similar program would have been more interesting. Concrete examples (RALA evaluation question, implementation - what happens next, etc.) would have helped someone like myself who are not so familiar with the topic but interested in it. "Healthy Canada by Design" - noone really talked about it except there was lively discussion on the on line chat. But it seemed the chat and the presentations were disconnected.
15.	Thank you for sharing the great work
16.	Having a copy of the RALA assessment tool available during/immediately following the webinar would be most valuable. I am trying to track this down post-webinar with additional time.
17.	I unfortunately was not available to attend due to other priority files. Look forward to obtaining the Powerpoint Presentation or the recoding of the Webinar. Ivan.
18.	Great format and very well organized. It would have been great to have more information provided Dr. Karen Lee. I also would have liked to see more content that was specific to the built form and planning realm.
19.	Thank you - the presenters were great!
20.	Enjoyed the webinar, especially learning the variety of perspective each of the 3 provinces took with similar elements.
21.	I was looking for more information/discussion related to varied Active Transportation systems and initiatives. Some of te discussion provided in type form while the presentations were going on, began to get to some of it. Lots of information presented. It remains to be seen if it is of use to me in my position as a provider of recreation and leisure services. Thanks for the opportunity to participate.
22.	Thank-you!
23.	This was a rally interesting webinar and the various presenters covered a lot of ground in a short time. I found it to be quite valuable.
24.	I was happy that participants were muted while the call was taking place. This made it so much easier to hear what was going on than on other calls I have been on.
25.	It was a good presertation with high quality speakers. Good job! Do keep it up!
26.	Keep them coming! :)
